DETAILED ACTION

Allowable Subject Matter

1. Claims 1-7 allowed.
2. The following is an examiner's statement of reasons for allowance:
Applicant's affidavit under 37 CFR 1.132 sufficiently demonstrates that the applicant's invention shows unexpected results not demonstrated by the prior art. Examples I and II of the declaration take Y1 and Y2, taught by JP '240, and substitute these for UA1 and UA2 used by the applicant. These are substituted in the same compositional ratio as applicant's example 1 shown in table 1 of the specification. The tensile elastic modulus achieved in examples I and II is not nearly as good as that observed in applicant's example 1 shown in table 1 of the specification. Protective ability, delta haze and, change in tilt angle are also much better in applicant's example 1. Applicant, further has shown that when Y1 and Y2 are used alone that these results, as exemplified in examples III and IV, are not even as good as those obtained in examples I and II in which Y1 and Y2 are used in combination with UA3. The tensile elastic modulus in examples III and IV is much less than that of examples I-II.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
